Q1
TEAMSET™

Rider to Passenger Intercom
Communication and Entertainment System

The *scala rider*® Q1 TeamSet features two pre-paired Q1 units in one package. It's the ideal communication system for a couple while on the road. Now, you can both stay connected!

The Q1 will simultaneously connect to mobile phones, A2DP (Bluetooth® stereo) music players, and GPS navigation devices. It also has a built-in FM radio with RDS and a cable is provided to connect to older MP3 players.

Click-to-Link® technology, allows Q1 users to join the social roadside revolution and the several hundred-thousand scala rider bikers who already enjoy spontaneous intercom with each other without the need for advance pairing.

While riding with a passenger, the Q1 will allow you to share your favourite music with **Music-Sharing**™ technology, so you can both enjoy the same tunes as you get around.

To ensure that your scala rider remains at the forefront of technology, you can update its software online via your Mac or PC*

The scala rider Q1 TeamSet comes equipped with interchangeable hybrid and corded microphones providing the ultimate solution for virtually any helmet.
